About Us

Overview

Automation is all about leveraging technology to the benefit of end users, making life easier, safer and more convenient. At Zoya Smart Homes, we see automation as an avenue to touch lives and enhance living in meaningful ways. We aren't a regular home automation company, because technology in itself is not limited, rather we grow every day with new ideas that are continuously implemented to further satisfy our cherished clients and push the minds of our ever-creative group of teams.

At Zoya, right from inception we believe strongly in not being limited, thereby growing a team that aren't constricted by a box to think out of. We are deeply committed to creating an indelible mark in the evolving world of the Internet of Things and wireless technologies, mostly for the benefits of our end users. Instead of just the procurement and assembling of instruments, we focused on the manufacture and development of automation products and solutions.

MISSION & VISION

OUR MISSION

At Zoya Smart Homes, we produce, sell, and install top notch smart products that are used to create an extremely comfortable and secure smart home or environment. Our ideal goal is no matter where our customers find themselves, they can carry home wherever they go, be it just home, or business, church, school or whatever it may be, the goal is to bury limitations and enhance accessibility.

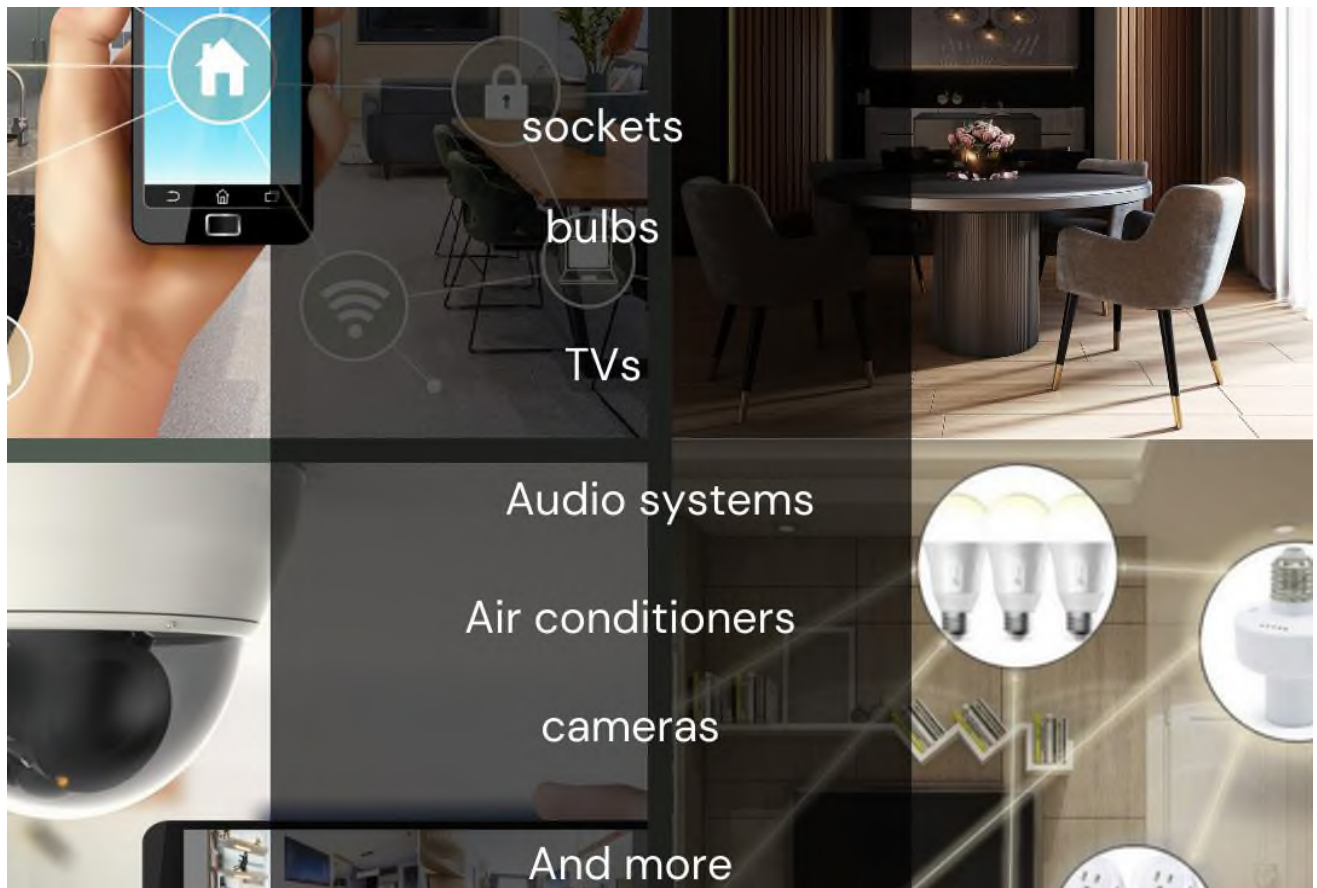

OUR VISION

Our company is innovative, efficient and accountable. Top three ethics every member of the company to the last staff runs by. Day by day we're led and driven by new ideas, and these ideas are worked upon and run efficiently, with accountability.

HOME AUTOMATION:

Home automation involves the use of smart devices and technology to control and manage various aspects of a home, such as lighting, security, and entertainment systems, through centralized control systems or mobile apps.

SMART HOME INSTALLATION & CONFIGURATION:

This service includes the setup and configuration of smart home devices, ensuring they work seamlessly together. It involves installing sensors, smart appliances, and connecting them to a central hub for remote control and automation.

SALES OF SMART HOME PRODUCTS:

This service involves selling a wide range of smart home devices and products to homeowners, allowing them to choose and purchase the equipment that suits their needs and preferences.

EXQUISITE LIGHTING (INDOOR/OUTDOOR):

It refers to the design and installation of high-quality and aesthetically pleasing lighting systems for both indoor and outdoor spaces. This service focuses on creating visually appealing and functional lighting solutions.

INTERIOR DESIGN:

Interior design involves planning and decorating interior spaces to enhance their aesthetics, functionality, and overall appeal. It often includes selecting furniture, color schemes, and decor elements that align with the client's vision.

CONSULTATION:

Consultation services involve providing expert advice and guidance to clients regarding various aspects of home automation, interior design, and smart technology. Consultants help clients make informed decisions based on their needs and goals.

SMART SECURITY SYSTEM:

This service includes the installation and configuration of advanced security systems that incorporate smart cameras, sensors, alarms, and access control features to protect homes from intruders and enhance safety.

MULTI-ROOM AUDIO DISTRIBUTION:

Multi-room audio distribution involves setting up audio systems that allow homeowners to play music in different rooms or zones of their house independently or simultaneously.

SMART HOTEL CONFIGURATION:

This service is tailored for hotels and hospitality businesses. It includes configuring smart technologies in hotel rooms to enhance guest experiences, such as automated lighting, temperature control, and entertainment systems.

SMART GATE AUTOMATION:

Smart gate automation focuses on automating the opening and closing of gates, entrances, and driveways using smart devices and control systems, enhancing convenience and security.

SMART CINEMA SETUP:

This service is about creating home theaters or entertainment spaces with advanced audiovisual systems, immersive sound, and high-quality projectors or screens for a cinematic experience at home.

GENERAL ELECTRICALS:

General electrical services encompass traditional electrical work, including wiring, outlets, and electrical system maintenance, alongside the integration of smart technology into electrical systems.

SOLAR INSTALLATION & MAINTENANCE:

Solar installation involves setting up solar panels and systems to harness renewable energy from the sun. Maintenance services ensure the efficiency and longevity of solar installations.

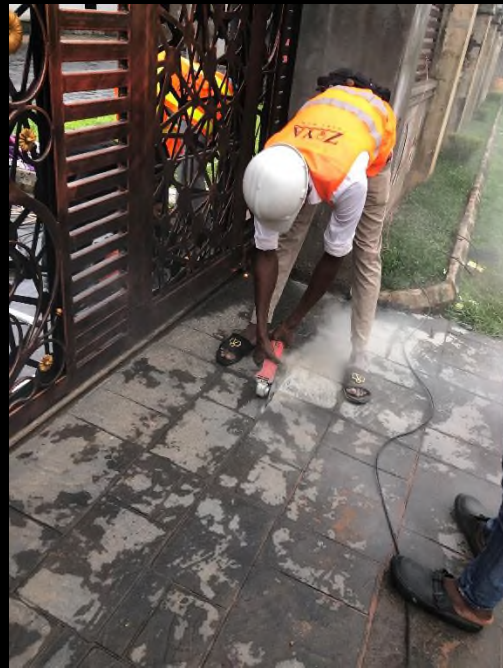

Each of these services contributes to creating smarter, more efficient, and more comfortable living spaces while catering to the specific needs and preferences of clients.

FEATURED SERVICES

ABOUT US

Zoya Smart Homes is a leading home automation company in Nigeria with a wide range of smart products designed for ease, security and convenience that enables one total control of homes, offices or other institutes anywhere and anytime.

OUR MISSION

At Zoya Smart Homes, we produce, sell, and install top notch smart products that are used to create an extremely comfortable and secure smart home or environment. Our ideal goal is no matter where our customers find themselves, they can carry home wherever they go, be it just home, or business, church, school or whatever it may be, the goal is to bury limitations and enhance accessibility.

Changing life for the better

We're existing simply for our customers, to generate the best options of smart homes automation in the country and West Africa. We serve to please and make lives easier, secure, convenient and smart.

Start with a vision

The vision of the company is to create and infiltrate the nation with an affordable option of smart homes. Zoya Smart Homes was created with a vision to be amongst the top lead smart automation companies, but with a big difference, this difference being quality given at firesale; within the financial means of most people.

Convenient Automation

At Zoya Smart Homes, innovation and continuity is key. We believe evolution is a continuous process and technology is one thing that most definitely will continue to develop over the years and we've decided to key into that with our own contribution to the society.

Value Statement

Our company is innovative, efficient and accountable. Top three ethics every member of the company to the last staff runs by. Day by day we're led and driven by new ideas, and these ideas are worked upon and run efficiently, with accountability.

Executive Summary

Zoya Smart Homes is an automation company that deals in the manufacturing, sales & distribution, configuration and maintenance of smart devices which in turn enable the automatic control of household features, activity and appliances.

Home Automation is simply the total and automatic control of electronic appliances in your home from wherever you are.

At Zoya, right from inception we believe strongly in not being limited, thereby growing a team that aren't constricted by a box to think out of. We are deeply committed to creating an indelible mark in the evolving world of the Internet of Things and wireless technologies, mostly for the benefits of our end users. Instead of just the procurement and assembling of instruments, we focused on the manufacture and development of automation products and solutions.

We produce state of the art masterpieces that are made with quality materials to generate the most practical, functional and operable gadgets and instruments. We ensure that they are energy efficient, durable and adaptable for the use of our various clients.

Daily, we ensure continuous augmentation of newer technology and commitment to the growth of our services to our ever-thriving clients to ensure progress, stability, satisfaction and convenience.

What makes home a Smart Home?

A smart home is a house setting in which appliances and devices may be controlled remotely using a mobile device or other networked device from anywhere, any location with an internet connection.

All devices of a smart home are connected via the internet, allowing the user to handle features such as home security, temperature, motion detection, lighting, etc...with ease, efficiency and convenience.

Electronics, proper configuration and connectivity are the backbones of a smart home, and all of it can be controlled from one central location -a smartphone, tablet, or laptop. Or more than one central location, all according to the wants of a client.

There are various parameters through which an end user can access and control his entire home set up, but all are customarily set-up to just his control for safety purposes.

Zoya Smart Homes can help you attain all these, with utmost ease and reliability. Everyone deserves a luxurious, safe and smart life.

Apart from providing a lifestyle of ease, comfort and safety, we are also dedicated to energy saving and nurturing the environment, hence the use of power saving and non toxic gadgets.

Zoya Smart Homes advantage

1. Efficiency

Operate several gadgets in your home with a single touch button or through a mobile application set up on your device. Control your temperature and lighting, keep an eye on security, close window blinds or curtains with ease and many more, all with an easy click, tap or touch from anywhere you are. Save more and enjoy more.

2. Security

Integrate a safer home with strategically placed sensors, gate openers, security alarm systems and cameras, which can all be monitored and activated from your phone, strictly customized to your private settings.

3. Customization

Personalize each electronic device setting to your taste and privacy as well as establishing schedules and personal modes.

4. Comfort

Eliminate the need to move around your house to conduct various tasks and monitor movement within your vicinity. Have full access to your house on the palm of your hand while sitting peacefully in bed.

5. Peace of mind

Have full access to check doors, sensors, gas spillage, gate access, etc at anytime and anyplace.

ZOYA SMART HOME'S HUMANITARIAN CONTRIBUTION TO SMART HOME EDUCATION

We are thrilled to share with you the remarkable humanitarian work that Zoya Smart Home has undertaken at Technical College School and the Edo Innovation Hub, particularly in the teaching of smart homes and smart products.

Zoya Smart Home has been instrumental in advancing the education and awareness of smart home technology at Technical College School. Through our generous contributions, the school has gained access to cutting-edge smart home products, educational resources, and expert guidance. This invaluable support has empowered students to explore the exciting world of smart homes, equipping them with the skills and knowledge needed for the future.

Additionally, Zoya Smart Home's involvement at the Edo Innovation Hub has been pivotal in fostering innovation in the field of smart products. By providing mentorship, resources, and a collaborative platform, they have catalyzed the development of innovative smart solutions. This not only benefits local entrepreneurs but also contributes to the growth of the smart technology industry in our region.

Zoya Smart Home's dedication to enhancing education and innovation in the realm of smart homes and products exemplifies their commitment to humanitarian values and technological progress.
